JONATHAN GRIFFITH
8384 E SOLANO DR
SCOTTSDALE, AZ 85250

Dear Jonathan Griffith:

Making sure you have access to affordable medications is our priority. To keep costs low, your plan covers a specific list of medications that may change occasionally. We're writing to let you know about some upcoming changes that will require you to change from a generic to a brand-name medication – and help you understand exactly what you need to do. The good news is you won't need a new prescription and the brand-name medication will not cost more – you'll pay the same amount.*

The medications covered by your plan are changing.

Starting January 1, 2020, the generic medications listed below will no longer be covered by your plan. If you continue to fill prescriptions for them, you will have to pay the entire cost. To avoid this, change to the brand-name medication.

Your current generic medication:

AMPHET/DEXTR CAP 20MG ER

Brand-name medication that will be covered by your plan:

ADDERALL XR

Here's what to do and what you need to know.

1. Ask your pharmacist to fill your prescription with the brand-name medication listed above.
2. Starting January 1, 2020, if you fill a prescription for a generic medication that is no longer covered, you'll have to pay the entire cost.

We want to make sure your medications continue to be covered, so be sure to make this change.

Sincerely,
CVS Caremark

Caremark.com

*Cost may vary depending on plan design, the brand-name medication will be at the same tier copay as the generic.
